User-Interface Design

AUMS User Analysis

User Analysis:

1. AUMS stands for Amrita University Management System

2. Amrita UMS is a comprehensive and innovative system for the effective management of content, learning management services, assessment management services, and learning administration services.

3. Amrita UMS practically covers the entire area of operations of the university

4. Amrita UMS is a fully integrated, highly configurable, platform independent university-wide Information System with scalability and performance at the same time ensuring to meet all the needs of an educational institution and much more.

5. User Analysis of AUMS is the website is widely used by students and the faculties working in amrita. It is used to manage important things like checking internal marks, attendance and the educational details of their own.

PROS of AUMS:

1. The AUMS Website allows students to check their attendance on each course that they have registered with the number of classes attended and percentage drop etc.
2. Students can check their Semester Results followed by Marks scored on each individual course
3. Students can pay their due fees in the AUMS portal itself
4. Students can renew the book return date in AUMS portal itself rather than Using Library OPAC Tool
5. Students and Faculty Members will get notifications reg. the submission of assignments , date of test , upload of course study resources etc .
6. Students can access the test via Calendar Link instead of redirecting to the Course Code Tabs mentioned in the top bottom of the website !
7. Students and Faculty Members can access their relevant Course Code Tabs in organized manner through which is designed in the top right corner of the website

CONS of AUMS:

1. "The Message of the Day" in AUMS Portal Doesn't change daily or on a Regular Basis
2. The Attendance Page of the AUMS Portal is not aligned properly with the Original Size of 100
3. Sometimes the website feels slow and laggy due to user traffic.
